PROFESSIONAL SUMMARY

Civil Engineer graduated from UFSC, currently pursuing a degree in Systems Analysis and Development, with experience in regulation, planning, automation, and software development. Combines Python, SQL, Power BI, and full-stack development with a background in engineering and infrastructure processes. Focused on transforming complex workflows into digital solutions, web applications, and strategic dashboards to optimize operations and support decision-making.

EDUCATION

Civil Engineering – Federal University of Santa Catarina (UFSC) | 2024
Grade Point Average (GPA): 8.8/10.0

Systems Analysis and Development – UNINTER International University Center | 2025 – 2028
Awarded a 100% full merit scholarship based on national exam (ENEM) performance.

EXPERIENCE

Civil Engineer | ARESC – Public Services Regulatory Agency of SC
Dec/2024 – Present

- Development of a modular web application using Django, HTMX, Alpine.js, and Tailwind CSS; responsible for the Ombudsman module, including a public submission interface.
- Process automation with Python and Google Apps Script, reducing operational time by 40%.
- Development of Power BI and Google Sheets dashboards to monitor regulatory indicators.
- Work in public utilities regulation, oversight, and process documentation.

Full-Stack Developer & Cost Estimator (Freelancer) | Self-employed
Nov/2024 – Feb/2026

- Developed a Web App for engineering project budgeting using Django, Vanilla JavaScript, and SQL.
- Designed a database to structure cost inputs and compositions.

Planning & Market Intelligence Intern | SCGÁS
Sep/2023 – Jul/2024

- Created Power BI dashboards to analyze the pipeline project portfolio.
- Mapped and optimized project management processes using BPMN (Bizagi).
- Conducted geospatial and statistical studies with QGIS and Power BI, identifying potential customers.

Planning & Civil Engineering Intern | D'Campos Construction Company
Apr/2022 – Jul/2023

- Monitored 4 vertical construction projects (~12,000 m²), tracking schedule, quality, and quantities.
- Developed physical schedules in MS Project and quantity controls using the Sienge ERP system.
- Created service manuals and verification checklists to standardize quality.

TECHNICAL SKILLS

- **Programming & Web**: Python (Django), SQL, JavaScript, HTMX, Alpine.js, Tailwind CSS, Apps Script, Git.
- **Data & BI**: Power BI, Advanced Excel, Pandas.
- **Engineering & Planning**: MS Project, Sienge ERP, Bizagi (BPMN), AutoCAD.
- **Languages**: Fluent English (C2 – EF SET, 2022), Native Portuguese.
- **Certifications**: Harvard Certificates [CS50x (Computer Science), CS50P (Python), CS50 SQL, CS50 Web (Django/JS), CS50AI (Machine Learning)].
